Notes:

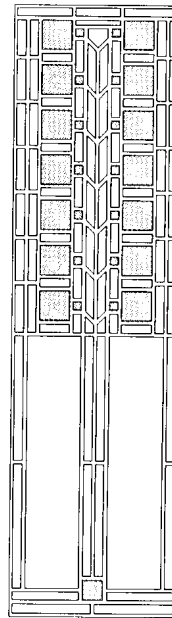

1. Dimensions are to outside of came, not wood frame. Add 1/8" for frame opening
2. Pattern drawings show both edge of glass and edge of came
3. Drawings are computer generated; and are more accurate than most patterns. This is important for geometric designs such as those depicted in this catalog.
4. Patterns are approximately the size of the original windows unless otherwise noted.
5. All patterns are based on windows designed in the early 1900's by Frank Lloyd Wright
6. Frank Lloyd Wright Restoration glass stock not. included on all pattern drawings when available. This glass is manufactured by Chicago Art glass Co. Note: most glass is clear window glass in Prairie Style window.
7. Prairie House Classics Came stock not. included on all pattern drawings. This came is identical to original came used by Frank Lloyd Wright.
8. Shaded areas on sketches in this catalog denote colored glass. Remainder is clear glass.

CLARITY

KALEIDOCOPTER

This unique kaleidoscope uses an angled mirror to reflect the image of the stained glass rotors through the optical system to your eye. Brilliant kaleidoscopic images appear when you turn the rotors and look into the tail of the kaleidocopter. Image rotors can be purchased separately to make quick, easy rotors without cutting stained glass.
