

PRAIRIE DESIGN LAMP PATTERNS

Dana Lamp
Catalog # PD-D-1

Plans, Patterns & Instructions for Single Pedestal Dana Table Lamp

Based on a 1903 design by Frank Lloyd Wright

This lamp is one of several table lamp designed by Frank Lloyd Wright for the Dana house (1903) and the W. R. Heath house (1905). A Dana lamp similar to the enclosed design sold for \$132,000 at a Christie's auction in New York on December 12, 1988. Replicas are sold for \$5,500.

The enclosed plans were derived from the Dana design. Changes were made to facilitate construction by crafts people with tools found in small shops. There are two major differences between the original lamp and these plans; a lamp harp is used to support the shade instead of two posts and the base is made of walnut rather than metal.

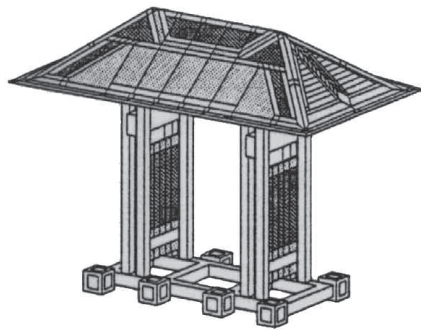

Included in the package

- 4 sheets of plans, 30" x 42"
- full size glass patterns
- patterns for two shade styles
- complete bill of material
- exploded views
- detailed parts drawings
- assembly instructions
- photographs

Plans, Patterns & Instructions for Double Pedestal Robie Table Lamp

Based on a 1909 design by Frank Lloyd Wright

Robie Lamp
Catalog # PD-R-1

This lamp was originally designed by Frank Lloyd Wright for the Dana house (1903). Later it was used in the Robie house (1909) with some modification to the panels. The Robie lamp was auctioned off at Christie's in New York on June 11 1988 for \$704,000. Replicas are sold for \$7,500.

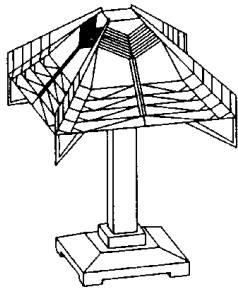

The plans were derived from the 1909 Robie design. Changes were made to facilitate construction by crafts people with tools found in small shops. There are two major differences between the original lamp and these plans; lamp harps are used to support the shade instead of four posts and the base is made of walnut rather than metal.

Included in the package

- 8 sheets of plans 22" x 34"
- patterns for two shade styles
- complete bill of material
- full size glass patterns
- exploded view
- detailed parts drawings
- assembly hints
- photographs

THE ODYSSEY SYSTEM

The Odyssey System is a complete lampmaking system tested and perfected during the production of hundreds of top quality lampshades at Paul Crist Studios. The Tiffany patterns offered by Odyssey were taken directly from original lamps, so they can truly be called "reproductions." The tools and processes are designed to make building a lampshade as simple as possible, while still retaining the sophistication and structural integrity of the original design. To ensure that your finished lamp doesn't look like just another stained glass project, Odyssey provides you with all the parts and accessories needed to finish it in a professional way.

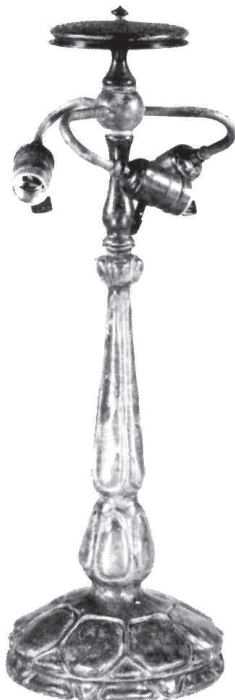

THE MOLD KIT

Each Odyssey mold kit contains one fiberglass mold, one each of mylar and paper pattern sheets and an instruction manual. Some mold kits also contain a supplementary instruction sheet, explaining special assembly procedures or construction problems specific to that particular shade. The mylar pattern sheet is designed to be cut apart into individual pattern templates for glass cutting. Mylar is durable and waterproof, so it can be used on a wet grinder. The paper pattern sheet is included for reference purposes, and may be colored to help identify what individual pattern pieces represent. On the pattern itself, each piece is numbered and lettered to indicate what it is supposed to represent (flower, leaf, etc.). When appropriate, pieces also bear an arrow to indicate glass grain direction or color shading. The 360° "Full Form" fiberglass mold is lightweight, dimensionally stable, and impervious to acidic fluxes and the heat of molten solder. The mold also has engraved pattern lines for fast accurate placement of glass pieces. Inset rim and ring ledges ensure that your lamp sits level on the base and has a straight lower edge.

THE WAX

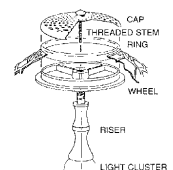

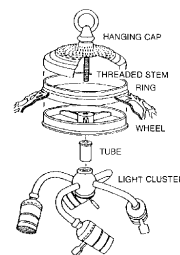

Odyssey's patented "Tacky Wax" is a revolution in lampmaking. "Tacky Wax" is a non drying adhesive that, when melted and painted on the surface of the mold, holds the glass pieces securely in place. You can put all of the glass pieces on the mold at one time, without the time consuming necessity of pins, tape, bridgeway straps, or tack soldering. It also gives you the freedom to cut, fit, foil and solder your lamp together in separate complete operations. "Tacky Wax" gives you the flexibility to position, reposition, or even recut any piece you want before actually joining anything together.

ODYSSEY BRASSWARE

Odyssey hardware and bases are designed to provide the perfect compliment to your Odyssey shade. As with the mold kits, they are exact replicas of Tiffany components. The master patterns for these bases were molded directly from original Tiffany lampbases. All cast parts are made from high-copper brass, just as Tiffany employed. Patinaed items are copperplated and chemically aged with a true verdigris patina. The patina is sealed in varnish and waxed to insure that its natural green-brown coloration will be preserved.

Odyssey hardware is designed specifically for supporting the heavy weight of a leaded glass lampshade. Odyssey replaced the weak harp system of most available lampbases with a sturdy riser, wheel, and cap system that holds the shade firmly in place. These parts are generally interchangeable between bases, allowing great flexibility in adapting a particular base to fit a particular shade. The broad surface area of the wheel provides maximum contact between base and shade to prevent wobbling and undue stress to either component. The vented cap allows heat which normally builds up in the shade to escape. The Odyssey rim protects the lower edge of the shade from damage as well as giving it a clean level edge for that professional finished appearance.

ODYSSEY ACCESSORIES

CROWN & BRANCH SETS

The Odyssey crown sets are exact replicas of Tiffany parts made from patterns taken from original lamps. They are in raw cast brass, specially machined to fit only the appropriate Odyssey base, and may require some filing to remove flashing in the holes. The branches are cast in pure lead to allow easy bending to fit the contour of your lamp mold. They are also copper plated to facilitate solder adhesion and help prevent melting of the lead.

<i>Catalog #</i>	<i>Description</i>
OD-CRB342	LARGE CROWN & BRANCH SET FOR OD-T342 & OD-T347 (fits OD-B342)
OD-CR342	LARGE CROWN ONLY FOR OD-T346 & OD-T348 (fits OD-B342)
OD-CR349	SMALL CROWN ONLY FOR OD-T349 (fits OD-B349)
OD-CR1424	SPIDER CROWN FOR OD-T1424 (fits 2" wheel)
OD-BR151	BRANCH SET ONLY FOR OD-T151

RINGS AND WHEELS

Odyssey ring and wheel sets are machined brass castings. Wheels are tapped 1/8" IPS which allows the cap, ring and wheel assembly to be adapted to standard lamp bases. Wheels are available in patina, to compliment the Odyssey bases, and raw, for those who want to do their own patina. Product numbers listed are for raw wheels.

Add a "P" to the end of the catalog number for patina.

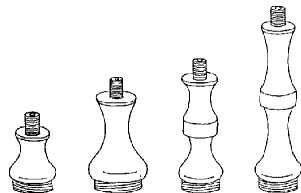

<i>Cat #</i>	<i>Description</i>
OD-R2	2" RING ONLY (2.25" outside diameter)
OD-W2	2" WHEEL ONLY
OD-R2F	SPECIAL RING TO FIT 2.25" FITTER
OD-R3	3" RING ONLY (3.9" outside diameter)

ODYSSEY ACCESSORIES

TACKY WAX

A specially formulated non-drying wax that is excellent for adhering glass to itself or almost anything else.

Catalog #	Description
TW-1	1/2 lb. TACKY WAX
TW-2	1 lb. TACKY WAX

TURTLE BACK TILES

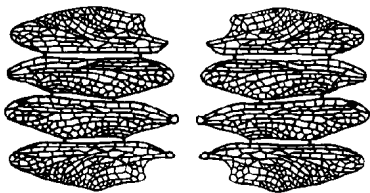

Odyssey's turtle backs are exact copies of those used in the original 16" dome. While the originals were hand chipped to the proper size from larger turtle backs, this difficult process is eliminated by pressing them into their final shape. The original chipped marks on the back are retained in the mold. Available only in dark emerald green with traditional "Favile" surface iridescence. 18 squares are required to complete lamp OD-T1434. Turtle backs come 4 to a patty and must be cut apart before installation. Diamond bandsaw recommended.

Catalog #	Description
OD-TB1434	18 TURTLE BACK TILES

FILIGREE

Odyssey filigree is 15 ml. raw brass to facilitate soldering to your shade. Some trimming may be necessary to make fit.

92" BALL CHAIN

This ball chain is raw brass, with 1/4" dia. balls. It is packaged in 92" lengths, which is enough to go around the rim of our 28" cones.

LOTUS BELL HARDWARE KIT

The LotusBell Hardware Kit contains all the metal parts you need to complete Odyssey's 16" Lotus Bell, OD-T422 . This includes a special 1 3/4" dia. ring, 5ft. of 12 gauge copper rim wire and 32 ft. of 14 gauge bronze rib wire. The bronze rib wire is fairly stiff, to give the ribs on your shade a straight and uniform appearance.

Catalog #	Description
OD-RW422	1-1 3/4" ring, 32-12" rib wires, 1-5 ft. length copper rim wire

ODYSSEY BASES

HT=Height
 BW=Base Width
 RSS=Recommended Shade Size

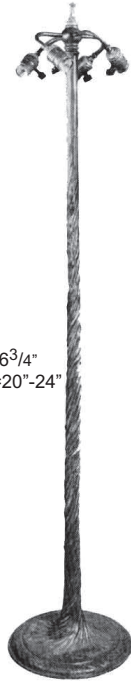

Odyssey bases are the highest quality, most authentic Tiffany reproduction lampbases available. These bases are in natural brown-green patina and feature copper plated solid brass castings, handrubbed antique finish, solid shade support structures, and flat keyed brass sockets. Height is measured to the top of riser where the lamp shade rests (not including finial). Base measurement is the diameter of the widest point across bottom. All bases come completely wired and include standard riser and finial. Not Stocked. Special order only.

Odyssey hanging clusters include threaded pipe and tube to fit Odyssey hanging cap and wheel. Tapped 1/8" IPS. Available in patina finish only.

ODYSSEY BASES

HT=Height
 BW=Base Width
 RSS=Recommended Shade Size

Classic American Lighting reproduction bases feature Tiffany's most popular models as well as the best of other period lamp base designs. They employ more complicated manufacturing techniques and many involve expensive lost wax castings. WB series are all bronze bases, patinated in natural Tiffany verdigris Patina and sealed in with a coat of clear lacquer. LB series are solid brass, hand finished in a rich bronze patina. Height is measured to the top of riser where the lamp shade rests (not including finial). Base measurement is the diameter of the widest point across bottom. All bases come completely wired and include standard riser and finial. Not stocked. Special order only.

3-TERMINAL KIT

Catalog # 3TERM

This kit was designed to be used with lamps created in the "Inner Glow" book by Donna Schulze. This kit contains all the electrical (less vase cap) to install and control a candelabra socket in the base of the lamp and a medium base (normal size light), on top of the base. Kit includes both electrical sockets, plug, cord, harp & saddle, finial, neck, nipple, nuts and instructions.
